

Consider EPI in your differential diagnosis of GI signs and symptoms

Patients with Exocrine Pancreatic Insufficiency (EPI) may present with signs and symptoms similar to some gastrointestinal (GI) conditions or diseases.¹

Overlapping Signs and Symptoms

	Diarrhea	Abdominal Pain	Bloating	Flatulence	Unexplained Weight Loss	Steatorrhea*	Anemia†	Fever	Hematochezia	Mucus in Stool	Anorexia	Constipation
EPI ²⁻⁴	●	●	●	●	●	●						
Irritable Bowel Syndrome—Diarrhea ⁵	●	●	●	●						●		
Celiac Disease ⁶	●	●	●		●	●	●					●
Small Intestinal Bacterial Overgrowth ^{5,7}	●	●	●	●	●	●	●					
Crohn's Disease ^{5,8,9}	●	●			●	●	●	●	●		●	
Ulcerative Colitis ⁵	●	●			●		●	●	●	●	●	

This chart is for discussion purposes only. Because the signs and symptoms of each GI disease can be numerous and vary by patient, this list is not intended to be used as a substitute for a healthcare professional's medical expertise and judgment to diagnose, treat, or care for any particular patient.

*Steatorrhea: >7 g of fecal fat per day while consuming 100 g of dietary fat per day.¹⁰

†Anemia has been reported in patients with EPI.⁴

If your patient presents with one or more signs and symptoms of EPI, consider EPI in your differential diagnosis.¹
